

We had a burglary reported on Black Horse Run Rd. yesterday. It occurred between around 8:00 AM and 5:00 PM. A television and several items of jewelry were taken. Even though this activity is unusual for the area, this was a very typical burglary. It occurred during the daytime while the residents were at work and the back door was kicked in. The items taken were very typical also. New plasma and LCD TV's are much lighter and easier to move than older ones and jewelry has been a very hot theft items for the last few years. The responding officer was able to collect some fingerprints and several smaller items were brought back to our evidence lab for fingerprinting.

Those of you at home during the daytime, please be extra vigilant in looking for suspicious vehicles and activity. Remember to be careful about high value items in your home. Very often, thieves know what's in a home and what they're looking for before they ever break-in.
